JINAL VARU

AI/ML ENGINEER

Vadodara, Gujarat, India | varujinal39@gmail.com | +91 6353012416 | linkedin.com/in/jinalvaru

PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on experience building and deploying Python-based machine learning and NLP solutions, including model selection, data preparation, algorithm tuning, and system integration via REST APIs. Skilled in TensorFlow, Scikit-learn, Pandas, and SQL for data preprocessing, feature engineering, and model evaluation. Proven ability to rapidly implement pre-trained AI models into production-ready applications, with a track record of shipping AI-powered platforms for real-world use cases. Quick learner, strong communicator, and eager to apply AI/ML expertise to enhance scalable, secure product features.

CORE TECHNICAL SKILLS

- **Languages & Data:** Python, SQL, Pandas, NumPy
- **ML/DL Frameworks:** TensorFlow, Scikit-learn, Deep Learning, Model Training & Tuning, Hyperparameter Tuning
- **AI Specializations:** Natural Language Processing (NLP), Computer Vision, Generative AI, Transformers, Speech Recognition
- **Integration & Deployment:** FastAPI, RESTful API Integration, Model Deployment, System Integration
- **Data Visualization & Analysis:** Matplotlib, Statistical Analysis, Data Preprocessing, Feature Engineering
- **Cloud & Tools:** AWS (familiarity), Git/Version Control
- **Soft Skills:** Cross-functional Collaboration, Communication, Documentation, Continuous Learning, Leadership

PROJECTS & APPLIED EXPERIENCE

Sahayta AI — AI-Powered Government Scheme Recommendation Platform *2025*

- Developed an AI-powered web platform using Python and FastAPI to simplify citizen access to Indian government welfare schemes, integrating NLP-based recommendation logic.
- Selected and fine-tuned pre-trained Transformer models for text classification and scheme-matching, improving relevance of recommendations for end users.
- Prepared and cleaned multilingual datasets, applying Google Translate API and gTTS for voice- and language-accessible interactions.
- Integrated OpenCV for document/image-based data extraction and SQL for persistent data storage and retrieval.
- Validated system performance through iterative testing to ensure accuracy of recommendations across varied user inputs.

Desktop Assistant — Intelligent Voice & Text Automation Tool *2024*

- Built an intelligent Java desktop assistant with a Java Swing GUI, capable of understanding and executing both voice and text commands.
- Integrated Wit.ai and Gemini APIs for natural language understanding and generative responses, embedding AI components into an existing application.
- Implemented and tuned speech recognition pipelines to convert voice input into actionable system commands, documenting algorithms used.

ADVANCED TRAINING

Code Unnati Program — SAP & Edunet Foundation

- SAP-supported advanced training covering AI/ML, Deep Learning, SAP ABAP on BTP, and SAP Analytics Cloud.

Campus to Corporate — Professional Readiness Workshop

- Corporate communication, professional etiquette, resume building, interview strategy, and workplace collaboration.

EDUCATION

Master of Computer Applications (MCA) *2025 – 2027 (Expected)*

Maharaja Sayajirao University, Baroda, Gujarat

- Relevant coursework: Algorithms, Data Structures, Database Systems, Software Engineering, Machine Learning, Web Development.

Bachelor of Computer Applications (BCA) *2022 – 2025*

Saurashtra University, Rajkot, Gujarat | CGPA: 8.5

- Relevant coursework: Programming (C, Java), Data Structures, Database Management Systems, Web Technologies, Software Engineering.

12th Standard (HSC) *2021 – 2022*

Premanand Vidhya Mandir, Junagadh, Gujarat | 77%

LANGUAGES

English | Hindi | Gujarati
